

Machinery training across Eyre Peninsula

A series of short courses designed to help you get to know your machinery and develop your skills. Do one, a few or all of them.

Fees are to be paid in full prior to the commencement in a course of study. No refunds apply unless the course is cancelled by TAFESA.

Heights & Confined Space

Work safely at heights (RIIWH5204D) & Enter and work in confined spaces (RIIWH5202D)

The materials in this course provide the information you need to undertake safe working practices at heights or depths including: identifying the work requirements, procedures and instructions for the task; accessing and installing equipment, performing work at heights and cleaning up the work area. The work required in this unit relates to the National Standard for High Risk Work (Enter and work in confined spaces).
